

## BR98-TB TRUCK MOUNTED TOP BOXES

The revolutionary tapered design of the BR-98-TB gives greater storage space while improving wind resistance. The boxes have been extended by two inches for increased load capacity. A steel headboard is provided to connect the two side boxes and a steel foot is provided to support the units at the rear of truck. The increased bottom dimension (foot print) of the box allows the side doors to fold straight down without touching the truck sides. The double-skinned doors make for a very lightweight, sturdy door. Adjustment strips and automotive type seals are provided on all doors to assure leakage prevention.

### FEATURES:

- ↳ fiberglass construction
- ↳ Will not rust or corrode
- ↳ Lightweight and durable
- ↳ Stainless steel hardware
- ↳ Easy installation
- ↳ Custom shelving arrangements
- ↳ Provides full access to existing bed
