

BR-RWC REAR WINDOW STORAGE COMPARTMENT

This rear window unit is robustly constructed out of FIBERGLASS to assure a long and corrosion free life. The sliding window is made out of LEXAN and the track was specially designed to give years of trouble-free operation with no “rattle” at low frequency vibrations.

SPECIFICATIONS

Colour: White Gelcoat
(Custom colours available at an additional charge)

INSTALLATION

The unit is shipped complete with a kit to facilitate installation. The space envelope required to install the compartment unit behind the rear cab window is: Length 52", Height 17", and Depth 12".
